PARTICULARITIES

‘Environment approval’: this is an additional proficiency test identical to the tests of programme 4C but at low concentration levels to meet the requirements of the French Order of 27/10/11 completed by the order of the 19/10/19 for the relevant parameters (as long as it is possible to maintain the quality of the test).

‘Health approval’: the specific programme 92 provides concentration levels appropriate for atypical and non-atypical mineral waters for BTEX (benzene, toluene, xylene ortho, xylene para + xylene meta, total xylene, ethylbenzene) and some VOHs.
